**In 2006, 52 members of Slovak Ornithological Society/BirdLife Slovakia ringed altogether 27.328 birds, of them 3.525 were nestlings (12,9 %). The most numerous ringed species were *Sylvia atricapilla* (3.192 ex.), *Erithacus rubecula* (2.640 ex.), *Coccothraustes coccothraustes* (1.558 ex.), *Fringilla coelebs* (1.354 ex.) and *Phylloscopus collybita* (1.186 ex.). The ringed birds belonged to 163 species.**

In Attachmend:

***Table 1. Bird ringing activities in Slovakia in 2001 – 2006 (suma n = total No of ringed birds, % pull = % ringed young of the total No. of ringed birds, S = No. of ringed species, K = No. of active ringers)***

***Table 2. Bird ringing results in Slovakia in year 2006***

***Table 3. Most frequently ringed Passerines bird species (No. of pull. in brackets)***

***Table 4. Ringed Nonpasserines species in year 2006 – the first ten (No. of pull. in brackets)***

***Table 5. Bird species with the highest number of ringed young.***
