Part 2 – Number of birds ringed and recovered by the Gdańsk Ringing Scheme in 2001 and 2002	7

Gdansk Ringing Scheme 2003

To the end of the 2001 year Gdansk Ringing Scheme was run by the Ornithological Station, functioning as a department of the Institute of Ecology of the Polish Academy of Sciences (PAS). The Institute of Ecology was located near Warsaw.

Since the beginning of 2002 year the basic change in the status of the Station was done. By the decision of the President of PAS, the Station was removed from the Institute of Ecology and declared as independent Institute for Ornithology PAS, located in Gdansk, reporting only to PAS.

The Institute for Ornithology is led by a director, appointed as the result of a competition and acting over the period of 4 years. At the moment we are waiting for the conclusion of the first such competition which will take place in the beginning of October. The ringing scheme is a separated part of the Institute, as by a head appointed in the result of the decision of the director. At the moment Prof dr Maciej Gromadzki is appointed as Director – Head of the Scheme, and Tomasz Mokwa as the General Administrator of the Gdansk Ringing Scheme.

In years 1931-1939 the Polish ringing scheme reported to the director of the State Zoological Museum in Warsaw. In the years 1945-1990 it reported to the director of the Institute of Zoology PAS, and than, in years 1991-2001- to the director of the Institute of Ecology PAS. In that period, a kind of a control of ringing in Poland was in jurisdiction of the Minister for Environment, as a body responsible for species protection (in Poland almost all bird species are protected), but the ringing as such was not mentioned in any act of the Polish law, and it was not mentioned in any document of the Polish Academy of Sciences too.

The Institute for Ornithology PAS, as independent research unit had to get its own constitution. One of the paragraphs of that constitution is orientated on ringing, and national ringing scheme is mentioned there as one of main duties of the Institute. That constitution, signed by the President of PAS, there is the first document, in which ringing is mentioned among duties of the Polish Academy of Sciences. It was a good result obtained at that moment.

Unfortunately, the position of the ringing scheme in Poland became much more complicated in the middle of 2002, after declaring by the Parliament the new act about the protection of animals. In this act the definition of the experiment on animals has been changed, and according to that definition bird ringing was included to the scope of such experiments.

The whole scope of experiments on animals there is in the justification of the National Ethic Committee (NEC), reporting to the Ministry for Science. For

every experiment the person planning the experiment is obliged to get the permission from NEC. Such preparation would be necessary for every ringing activity. What did it mean for ringing in practice is clear for every ringer.

After very heavy long lasting discussions with NEC we achieved the situation in which the existence of the national ringing scheme is accepted and all decisions connected with ringing licenses are shifted by NEC to the Institute for Ornithology. This solution is good for the moment but not good enough for long existence of ringing in Poland – it may be changed by every new NEC body.

For that reason we try to introduce bird ringing to a new act on nature protection, which is prepared by the Polish Parliament now. In the draft version of that act, ringing is treated as activity removed from the scope of experiments on animals. According to that propose bird ringing will be subordinated to the Ministry of Environment, which is responsible for all problems of nature protection in Poland. If this law is accepted by the Parliament bird ringing in Poland will be introduced to the national law system. The executive regulations will be issued by the Ministry for Environment and we do hope that this regulation will be beneficial for the system. We do hope that all the system will be ready this year.

Completely other problems creates funding the activity of ringing scheme. The research unit (as the Institute) gets statutory payment from the State, which depends on ranking, in which mainly printed papers (prepared in the unit) are taken into consideration. That means that ringing scheme is not able to contribute successfully to this ranking and there is necessary to find funds for it from sources different than the state budget. In years 1990-1998 the ringing scheme activity was paid from funds got from so called *fund for special projects*. Unfortunately that possibility of funding was lost by the late Institute of Ecology since 1999 and it is almost impossible to recreate it now. Summarizing: at the moment we are able to get funds for about 25% of ringing scheme costs from the state budget. For remaining 75% of the ringing scheme budget we are searching for other sources of funds.

Since 2002 year we ordered payments for the use of rings from professional ringers, who get funds for their research from different sources. The other ringers are not paying for rings at the moment but instead they meet different limitations in ringing, specified by the Scheme. This solution gives us additional 5% of the budget. The rest has to be paid from the general budget of the Institute.

This solution is possible for very short period only and not for the long lasting run of the ringing scheme in the country. If we are not able to generate new sources of funds for ringing scheme it will be necessary to limit drastically

ringing activity in Poland in the nearest future. For that reason it is necessary to get funding for ringing and especially for funding the activity of ringing schemes from international funds, most probably from EU funds. We are afraid such funding will be crucial for the existence of ringing not only in Poland. This is the conclusion which we address to the EURING Board as a matter of urgency.

Ringers and ringing courses

All ringers are licensed every year by the Institute for Ornithology PAS on the base of the permission given by the Ministry for Environment, and since 2002 on the base of the permission given by the National Ethic Committee.

The candidates for ringers for their first license have to pass an exam, including the field test checking the knowledge of bird species, age and sex criteria as well as the attitude of the candidate to living birds kept in hand. In 2001 eleven, in 2002 twelve new–accepted ringers got their ringer licenses.

In 2001 there were 241 licensed ringers in Poland, but only 171 of them were ringing actively.

In 2002 there were 251 licensed ringers in Poland, 169 were ringing actively.

Rings

Gdańsk rings are made by the Polish producer "Aranea". 22 different sizes made of two kinds of material (steel and aluminium) are used. From June 2001 ringers have to pay for same rings. Only rings used on nestlings and breeding birds with known status and rings used as a part of CES or Swallow Project are free.

Colour–ringing and other marks

Colour–ringing and marking is coordinated by the ringing scheme, but administration is done by the users. There are regular contacts with international coordinators. The colour–ring website of Dirk Reas is used regularly.

Ringing projects

1. International projects

- CES,
- EURING Swallow Project,

- International Monitoring of Raptors & Owls (White-tailed Eagle, Osprey, Lesser Spotted Eagle, Spotted Eagle, Eagle Owl),
- Monitoring of Waders during autumn migration (3 sites),
- SE European Network (6 sites).

2. National projects

- Monitoring of the White Stork in Poland,
- Wintering Jack Snipe in Poland,
- Monitoring of the breeding population of the Mute Swan,
- Monitoring of the breeding population of the Whooper Swan,
- Monitoring of the Mołozewo breeding population of the Ringed Plover,
- Other species projects (Cormorant, Night Heron, Black Stork, Greylag Goose, Kestrel, Peregrine Falcon, Mediterranean Gull, Herring Gull, Yellow-legged Gull, Syrian Woodpecker, House Martin, Citrine Wagtail, Dipper and others).

CES

Gdansk Ringing Scheme joined the Constant Effort Site Project in 1999. From 1999 to 2002 working on average 10–14 CES sites yearly.

EURING Swallow Project

Gdansk Ringing Scheme joined the EURING Swallow Project in 2000. There were 2782 nestlings, 253 breeding adults and 4373 Barn Swallows captured in reedbeds (at 9 roosting places) ringed in Poland in 2000 by 15 ringers.

During next two years number of ringers involved in the project increased (25 ringers in 2001, 16 in 2002).

There were 6794 nestlings, 736 breeding adults and 9881 Swallows captured at 20 roosting places ringed in Poland in 2001.

In 2002 – 6161 nestlings were ringed, 452 adults at the nests and 4955 birds caught in eight sites in reedbeds.

We have received 30 foreign recoveries of birds ringed in Poland in years 2000–2002 (from Hungary – 17, Central African Republic – 4, Czech Republic – 3, Republic of South Africa – 1, Botswana – 1, Dem. Republic of Congo – 1, Zambia – 1, Italy – 1, Croatia – 1).

There were also 4 Barn Swallows ringed abroad (Lithuania - 1, Hungary – 1, Slovakia (Praha) – 1, Finland – 1) and recovered in Poland.

Computer system development

Ringing data

All ringing data have been put into computer since 2001. Ringing details from years 1931–2002 were put into computer partially (only number of ring, species, sex, age and data).

In 2002 about 60% Polish ringers sent data by floppy discs.

Recoveries

Since 1987 all recoveries have been prepared by computer. About 80% of recoveries received earlier has been already put into computer as well.

Number of recoveries in 2001

- 7407 – total number
- 1381 – recoveries of birds ringed abroad
- 6026 – Polish recoveries

Number of recoveries in 2002

- 14501 – total number
- 1492 – recoveries of birds ringed abroad
- 13009 – Polish recoveries
